

## TIME SAVING SUPPLY CHAIN SOLUTIONS

[WWW.ACTIONELECTRONICS.COM](http://WWW.ACTIONELECTRONICS.COM) | 508.668.3131

## WHO WE ARE

Action manages value-added services and multiple components of your supply chain. As a best-in-class provider of leading-edge solutions, we identify real cost exposure and deliver enhancement to your bottom line through our customized kitting, procurement consolidation, OEM-ready hardware kits, and unique engineered delivery systems.

## MISSION STATEMENT

At Action Electronics, we harness the power of innovative technology and draw on our award-winning industry expertise to deliver personalized, value-added services that keep your processes running seamlessly and effectively.

## STRATEGY AND VALUE

Integrating Action as part of your team provides reliability, responsiveness, and agility within your organization. We have over 30 years of experience working with companies to optimize supply chains, reduce costs, balance inventory, and mitigate risk and part shortage. We consistently deliver a sustainable competitive advantage wherever you operate worldwide.

## EXPERTISE

Your business receives greater flexibility to react to various factors, including market volatility, special orders, inventory obsolescence, and small run, prototype program support. Our professionals provide you with the best service possible by refining and reconfiguring solutions as you grow and change. Action drives cost and complexity out of your supply chain, adding value and increasing your bottom line by streamlining the processes supporting your lean manufacturing objectives.

## OUR CORE

Action Electronics has been a supply chain solutions provider for over 30 years. Action prides itself on quality customer service because we make a concerted effort to go above and beyond for our clients. As a service provider, communication is one of our core principles. We understand that communication is vital in making the supply chain operate as smoothly as possible. Our team will always acknowledge all requests and respond to every email and phone call within 24 hours, regardless of time.

## BENEFITS

- Improve Cashflow
- Reduce On-Hand Inventory
- Improve Efficiency
- Support When You Need It
- Streamlined Purchasing Activity
- Less Product Handling
- Waste Minimization
- Reduced Paperwork
- Single Point Of Contact
- Vendor Consolidation
- Cost Reduction Along The Supply Chain
- Genuine Components Guaranteed

## OUR SERVICES

### Procurement

Our world-class procurement process can reduce a company's purchasing cost base by 8%- 12% and deliver additional annual savings of 2%-3%. We work closely with your team to identify and realize savings across all spend categories and procurement levers. We build your organizational capabilities so that you can sustain those gains over the long term.

### Mil-Spec Packaging

Action is a seasoned supplier of military specification protective packaging. We have a large inventory of Mil-Prf materials such as Film Foil, Poly Kraft, and ESD in stock to fulfill your bag, cover, and liner needs with rapid turnaround times. We also supply wide-width roll stock material, tubing, and sheeting; all manufactured from Mil-Prf certified materials. We have the capability to custom manufacture bags, blankets, and shrouds in any size and quantity.

### Kitting and Packaging

Kitting is a proven effective way to achieve air-tight inventory control and is a critical element of the lean manufacturing process. It enables the management of multiple components under a Kit Master Part Number while keeping full traceability of all parts. We can supply you with the needed components in the amounts required and where and when needed with various kit boxes or packaging choices.

### Inventory Management

Action has inventory management down to a science. We support this process by purchasing, supervising, controlling, and dispensing stock for sale stored in our secure facility. We cover all aspects of stock management across the supply chain, from the manufacturer to the point of sale operated by the retailer.

# OUR INDUSTRIES

## Aerospace

At Action, our primary mission is to help you overcome your logistical constraints. Our solutions for the aviation, space, and defense sectors tackle the specific challenges of each stakeholder, from manufacturer to after-sales service. As a critical supplier in the Aerospace industry, Action has supported thousands of parts and components to agencies worldwide. Action uses its thorough knowledge of our aerospace and defense customers to create new methods and tools for optimizing the supply chains in this vertical market. Our teams analyze the challenges of each industry while taking their evolution into account to offer customized, flexible, and agile solutions. We also emphasize a business a culture focused on innovation, with a community of experts that embrace creativity and teamwork.

## Defense

At Action Electronics, we are highly sensitive to the importance of reliable and accurate project timelines within the defense industry. Our service mentality and precise supply chain management processes have allowed us to build a reputation for reliability. We deliver our aircraft and ground support solutions on time with rapid production cycles and reliable distributed systems. Our team will partner with you to support your project goals and timeline every step of the way by employing our expert engineering knowledge, efficient production processes, quality standards, and streamlined distribution.

## Military

Action's military supply chain and logistics solutions help ensure the military has the tools and capabilities necessary to move services and resources - weapons, food, equipment, fuel, and more - where they're needed to support the warfighter. With Action's supply chain solutions, you keep operations moving smoothly around the clock while maintaining information security and real-time data analysis capabilities. Our actionable intelligence, automated processes, and unprecedented connectivity help you streamline operations, ensure compliance, and deliver supplies accurately, dependably, and on time.

## Government

Action Electronics is adept at moving various shipments through any geographic area. Action has been a major military supplier to the United States government for OEM and manufactured military equipment for over 30 years. In addition, Action is certified and possesses the infrastructure designed to meet the US government's demands. Our company is always ready to provide support services and advance warfighters. Action's goal is to provide exceptional, efficient supply chain management services.

# TRUE COST EXPOSURE

Supply Chain accounts for a significant expense within any business.  
We at Action Electronics call this **True Cost Exposure**.

1. Each Item That Is Ordered Must Be Processed, Handled, And Stored.

2. A Single Component Requires Labor To Procure And Receive It, Then Unpack And Inspect It For Quality Assurance.

3. Your Business Must Absorb The Cost Of Waste Disposal.

4. The Component Is Then Entered Into Inventory For Eventual Kitting Or Process Within The Supply Chain.

5. There Are Labor Costs To Package And Ship It To Its Destination.

6. Finally, A Team Has To Process The Paperwork For Billing. In The End, A Five-Cent Resistor Can Require The Efforts Of As Many As Eleven People To Process Them, Plus Inventory Carrying Costs.

FOR OVER 30 YEARS ACTION HAS BEEN THE FIRST CHOICE WHEN LOOKING TO ADD VALUE AND REDUCE COSTS WITHIN THE SUPPLY CHAIN

# CERTIFICATIONS

## Small Business Certification

Action Electronics certifications include the small business certification. This purchaser certifies at the time of executing timber sale. Contract No. This statement is annexed under the Rules and Regulations (13 CFR 121) of the Small Business Administration (SBA).

## AS9100D | ISO 9001 Certified

Action Electronics certifications include the AS9100D ISO 9001 Certified. AS9100D is a company level certification based on a standard published by the Society of Automotive Engineers (SAE) titled "Quality Management Systems - Requirements for Aviation, Space and Defense Organizations".

## ISO 9001: 2015 Certified

Action Electronics certifications include the ISO 9001:2015 Certified. ISO 9001:2015 is a company level certification based on the standard published by the International Organization for Standardization. It is titled "Quality management systems-Requirements." This standard revises ISO 9001:2008 to include a new, higher-level structure requirement. A common framework for all ISO management systems are risk-based concerning quality system processes.

## International Traffic in Arms Regulations Compliant

Action Electronics certifications include the International Traffic in Arms Regulation Compliant (ITAR). ITAR stands for The International Traffic in Arms Regulations is government regulations related to defense exports. The rules include policies and provisions related to prohibited exports and imports. This includes sales to or from specific countries, exceptions among many others.

## D-U-N-S Registered

Action Electronics certifications include the DUNS registered. Established in 1962, Dun & Bradstreet's Data Universal Numbering System is commonly known as the D-U-N-S® Number. This is a unique global business identification system that identifies, validates, and links to more than 280 million businesses worldwide.
