

INTEGRATED SUPPLY CHAIN SOLUTIONS

WHO WE ARE

Action manages value-added services and multiple components of your supply chain. As a best-in-class provider of leading-edge solutions, we identify real cost exposure and deliver enhancement to your bottom line through our customized kitting, procurement consolidation, OEM-ready hardware kits, and unique engineered delivery systems.

MISSION STATEMENT

At Action Electronics, we harness the power of innovative technology and draw on our award-winning industry expertise to deliver personalized, value-added services that keep your processes running seamlessly and effectively.

STRATEGY AND VALUE

Your business gains greater flexibility to adapt to market volatility, special orders, inventory obsolescence, and small-run prototype programs. Our experts deliver top-tier service, continuously refining and optimizing solutions to support your growth and evolving needs. Action Electronics reduces costs and complexity in your supply chain, adding value and boosting your bottom line by streamlining processes that align with your lean manufacturing goals.

EXPERTISE

Integrating Action Electronics into your team enhances reliability, responsiveness, and agility across your organization. With over 35 years of experience, we help companies optimize supply chains, reduce costs, balance inventory, and mitigate risks and part shortages. No matter where you operate, we consistently deliver a sustainable competitive advantage.

OUR CORE

Action Electronics has been a trusted supply chain solutions provider for over 35 years. We take pride in delivering exceptional customer service, consistently going above and beyond for our clients. As a service provider, communication is one of our core principles because we know it is essential to keeping the supply chain running smoothly. Our team is committed to acknowledging all requests and responding to every email and phone call within 24 hours, no matter the date or time.

BENEFITS

- Improve Cashflow
- Reduce On-Hand Inventory
- Improve Efficiency
- Support When You Need It
- Streamlined Purchasing Activity
- Less Product Handling
- Waste Minimization
- Reduced Paperwork
- Single Point Of Contact
- Vendor Consolidation
- Cost Reduction Along The Supply Chain
- Genuine Components Guaranteed

OUR SERVICES

Procurement

Our world-class procurement process can reduce a company's purchasing cost base by an average of 8%-12% and deliver additional annual savings of 2%-3%. We work closely with your team to identify and realize savings across all spending categories and procurement levers, and we build your organizational capabilities so you can sustain those gains over the long term.

Kitting and Packaging

Kitting is a proven effective way to achieve air-tight inventory control and is a critical element of the lean manufacturing process. It enables the management of multiple components under a Kit Master Part Number while keeping full traceability of all parts. We can supply you with the necessary details, in the amounts needed, and where and when required, with various kit boxes or packaging choices.

Inventory Management

We have inventory management down to a science. We support this process by purchasing, supervising, controlling, and dispensing of Stock for Sale which is stored in our secure facility. We cover all aspects of stock management across the supply chain from the manufacturer to the point of sale manned by the retailer.

Mil-Spec Packaging

We are a seasoned supplier of military-specification protective packaging. We have a large inventory of Mil-Prf materials such as Film Foil, Poly Kraft, and ESD in stock to fulfill your bag, cover, and liner needs with rapid turnaround times. We also supply wide-width roll stock material, tubing, and sheeting, all manufactured from Mil-Prf-certified materials. We can custom manufacture bags, blankets, and shrouds to any size and quantity.

OUR INDUSTRIES

Aerospace

We specialize in overcoming logistical challenges in the aerospace sector, supporting manufacturers, maintenance teams, and after-sales providers with tailored, reliable solutions. With over 35 years of expertise, we've delivered thousands of critical components to agencies and organizations worldwide. By leveraging deep industry knowledge, we optimize procurement and kitting processes to address the aerospace industry's evolving needs. Our innovative, agile approach empowers our expert team to collaborate, develop creative strategies, and ensure your success at every stage.

Defense

We are highly sensitive to the importance of reliable and accurate project timelines within the aerospace and defense industry. Our service mentality and precise supply chain management processes have allowed us to build a reputation for reliability. With rapid production cycles and reliable distribution systems, we deliver our aircraft and ground support solutions on time. Our team will partner with you to support your project goals and timeline by employing our expert engineering knowledge, efficient production processes, quality standards, and streamlined distribution.

Military

Our military supply chain and logistics solutions help ensure the military has the tools and capabilities necessary to move services and resources - weapons, equipment, fuel, and more - where needed to support the warfighter. With Action's supply chain solutions, you keep operations moving smoothly around the clock while maintaining information security and real-time data analysis capabilities. Our actionable intelligence, automated processes, and unprecedented connectivity help you streamline operations, ensure compliance, and deliver supplies accurately, dependably, and on time.

Government

We are adept at moving various shipments through any geographic area. Action has been a major military supplier to the United States government for OEM and manufactured military equipment for over 30 years. In addition, Action is certified and possesses the infrastructure designed to meet the US government's demands. Our company is always ready to provide support services and advance warfighters. Action's goal is to provide exceptional, efficient supply chain management.

TRUE COST EXPOSURE

Supply Chain accounts for a significant expense within any business. We at Action Electronics call this **True Cost Exposure**.

Every item ordered for your project must go through authorized distributors and requires careful processing, handling, and storage.

Procuring all the components for your project involves a step-by-step process: sourcing, purchasing, receiving, and inspecting for quality to meet the industry's high standards.

Your organization covers waste disposal costs, an essential part of operational expenses.

After correctly processing all the necessary components to your project, they must be physically integrated into the inventory, ready for future use in kits or within the supply chain.

The process includes labor and material costs for precise packaging and shipping to the intended destinations.

Finally, your team must undertake the task of processing each item, including managing its inventory and accounting for carrying costs.

FOR OVER 35 YEARS ACTION HAS BEEN THE FIRST CHOICE WHEN LOOKING TO ADD VALUE AND REDUCE COSTS WITHIN THE SUPPLY CHAIN

CERTIFICATIONS

Small Business Certification

Certified as a small business under SBA Rules and Regulations (13 CFR 121), ensuring eligibility for programs supporting small businesses.

AS9100D | ISO 9001 Certified

A recognized standard by the Society of Automotive Engineers (SAE) for quality management in aviation, space, and defense.

ISO 9001: 2015 Certified

Demonstrates compliance with international quality standards, with a focus on risk-based processes, continuous improvement, and maintaining high customer satisfaction.

ITAR Compliant

Fully compliant with the International Traffic in Arms Regulations (ITAR), governing the export and import of defense-related articles in accordance with U.S. policies.

D-U-N-S Registered

Registered under Dun & Bradstreet's Data Universal Numbering System (D-U-N-S®), a global business identification system connecting millions of companies worldwide.

NIST 800-171 Compliant

Compliant with the National Institute of Standards and Technology (NIST) Special Publication 800-171, ensuring the protection of controlled unclassified information (CUI) as required by FAR and DFARS.

For over 35 years, Action Electronics has delivered efficient procurement and kitting solutions with a focus on sustainability. We minimize waste, source eco-friendly materials, and adopt practices that support a greener future for the Aerospace and Defense industry.
